

Poultry Product

IBD Vaccine **(Live)**

Indications

Prevention of infectious bursal disease

Directions/Dosages

Dissolve 1 vial of the vaccine with the included diluent. In the case of administration for 2 to 4 weeks old chicks, dilute the vaccine with drinking water corresponding to daily water intake and give to chicks. For 10 to 16 weeks old chickens, inoculate 0.2 ml of the vaccine per chicken orally to 5% of the flock.
