

Swine Product

# ARBP Combined Vaccine (Inactivated)

## Indications

Prevention of swine atrophic rhinitis caused by *Bordetella bronchiseptica* and/or toxicogenic *Pasteurella multocida*

## Directions/Dosages

1. In the case of pregnant sows  
Administer 5 ml of the vaccine twice at an interval of 1 to 2 months by intramuscular injection; the second injection should be given at 1 month before farrowing. When using the vaccine as the booster dose at the next or succeeding breeding, 5 ml each of this product should be intramuscularly injected once at about 1 month before farrowing.
2. In the case of piglets  
Administer 1 ml of the vaccine to piglets aged 3 weeks or older. Give the vaccine twice at an interval of 3 to 5 weeks by intramuscular injection.
