

Swine Product

TGE/PED Combined Vaccine **(Live)**

Indications

Reduction of symptoms of porcine transmissible gastroenteritis and prevention or reduction of symptoms of porcine epidemic diarrhea in piglets through the transfer of antibodies in the colostrum and milk of vaccinated sows

Directions/Dosages

Dissolve 1 vial of the vaccine with the included diluent. Administer 2 ml of the dissolved vaccine to sows twice at an interval of 4 to 8 weeks by intramuscular injection; the second injection should be given at about 2 weeks before farrowing.
